Examiner's Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The closest prior art of record, Flaxer et al. (US PG-PUB 2004/0162741) neither anticipates nor renders obvious the combination of features, *inter alia*,

...
converting the commerce data from a format of the electronic document to a format of an adaptive document using a data adaptor, wherein the adaptive document is a semi-autonomous software unit that encapsulates business data and exhibits variable behavior based upon different processing states, and wherein the data adapter reconciles data formats so that data can be exchanged between different applications;

inputting the converted commerce data into the adaptive document, wherein electronic commerce actions performed on the adaptive document are dependent upon a state of said adaptive document;

initializing a transport adaptor to determine a messaging protocol between a current location of the adaptive document and a destination location of the adaptive document, wherein the transport adaptor translates messages between messaging protocols used by different applications;

...
Updated searches were performed using the amended claim languages.

Also of interest are Chen et al., US PG-PUB 20030018694 and Lai, US PG-PUB 20050044197, which neither anticipate nor render obvious the above combinations.

The closest prior art of record is previously cited Ferguson, WebSphere as an e-business server. However, Ferguson does not provide specific functions such as the above combinations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
